

As A Licensed Amateur radio operator FCC call sign KB0ZUQ I wish to express my concern with the BPL technology. This would ruin the radio spectrum as we allow it. The powerlines are unshielded radiating antennas. the technology is an attempt by large commerce to find the easy way to big money stepping on all in their way. Many of the thousands of miles of powerlines in this country are in bad need of replacement now.. Amateurs are a very valuable resource in times of disaster proven time and time again.. This technology will destroy all the value. No matter where a disaster may happen powerlines and BPL will be there and causing spectrum pollution.. Please reconsider the damage this will cause....
